

FAMILY OF SERVICES (FOS)/NOAAPORT

WMO Resolution 40 “Additional Data and Products”

- The International Data Service II-A and the International Data Service II-B services of the FOS, which carried the restricted WMO Resolution 40 data and products, were discontinued on September 30.
 - A NOUS40 KWBC notice and an e-mail notice was sent to inform FOS subscribers and NOAAPORT users of the addition of Resolution 40 data and products to their data streams.
 - FOS subscribers and NOAAPORT users are reminded, on a weekly basis, in these notices, that in order to assure the continued exchange of weather information between nations, they as data distributors needed to be cognizant of and to make sure that their customers are aware of the WMO Resolution 40 policy pertaining to the re-exportation of data into the originating nation for commercial use.
 - A list of all products identified as “Additional Data and Products” by the country is available via the internet at: (<http://www.nws.noaa.gov/oso/addata.shtml>).

FAMILY OF SERVICES (FOS)

SERVER ACCESS SERVICE

- The National Weather Service (NWS) Family of Services (FOS) has added a new Service. The new service is called the Server Access Service (SAS).
- SAS was implemented on October 1, 1998.
- SAS will allow direct user access to the product data files located on Office of Systems Operations (OSO) servers.
- FOS subscribers were provided with SAS service information sheets and a listing of the product data files.
- The FY 99 annual subscriber fee for the SAS is \$14K
